IJS - Ljubljana – Slovenija

9. oktober 2023

O konferenci

Konferenca bo po obliki podobna kot dosedanjih 16 demografskih v okviru multikonference Informacijska družba (is.ijs.si).

Ko smo desetletje in pol predstavljali demografske projekcije in dileme, se je predvsem pred nekaj leti po nastopih v parlamentu dvignilo precej kritik in zanikovanja. A sedanji podatki jasno kažejo, da so bile naše projekcije povsem pravilne in tudi za naprej so kredibilne. Posledice zanikovanja znanstvenih ugotovitev se kažejo danes in tu, še bolj pa se bodo v bližnji prihodnosti in naprej. Če ne želimo doživeti demografske in posledično celovite kalvarije, moramo čimprej prenesti spoznanja v javnost in prepričati vodstva držav, da najde primerne rešitve.

Izrazu »evropska demografska zima« se pridružujejo izrazi kot »civilizacijski propad Evrope«, strokovni realistični analizi se ob bok postavljata kot en ekstrem demografska brezbržnost in kot drugi panika, scenariji propada. Tudi Slovenija, Hrvaška in druge države se srečujejo s podobnimi demografskimi izzivi. Projekcije kažejo izumrtje malih evropskih narodov v nekaj stoletjih kot posledico premajhne rodnosti. Skoraj pol stoletja premajhna rodnost preti z dolgoročnimi hudo negativnimi posledicami in kratkoročno zmanjšano kvaliteto življenja v javni in zasebni sferi (družinski odnosi), gospodarstva, pravzaprav večine komponent delovanja družbe in države. Z veliko gotovostjo lahko zapišemo, da bodo demografske odločitve pomembno krojile kakovost življenja ljudi v prihodnjih desetletjih.

Kako se problematike okolja in demografije ustrezno lotiti, kakšni so razvojni trendi in ideje v svetu, EU in v Sloveniji? Vse to bodo teme strokovnih razpravljanj na demografski konferenci Demografske in družinske analize, ki bo potekala v okviru 26. multikonference Informacijska družba 2023.

Vabimo vas, da se udeležite izredno pomembnega dogodka s svojim prispevkom ali s prisostvovanjem na predavanjih. Udeležba na predavanjih je brezplačna.

Napotki avtorjem

Programski odbor k sodelovanju vabi avtorje, ki lahko s svojimi prispevki predstavijo nove ideje in trende na področjih, ki jih pokriva konferenca.

Dobrodošli so tako teoretično kot empirično zasnovani prispevki, vedno pa morajo biti umeščeni v okvir strokovnega ali znanstvenega dela.

Prispevek naj načeloma ne presega štirih strani A4 formata, najkrajša dolžina pa je pol A4 strani. Napisan je lahko v slovenščini ali angleščini. Povzetek je obvezen, literatura in drugi sestavni deli morajo ustrezati običajni strukturi člankov, predstavljenih na znanstvenih konferencah.

Format prispevka je dostopen na internetni strani: https://is.ijs.si/?page_id=14413. Avtorji naj oddajo prispevke z naslovom, elektronsko pošto in naslovom korespondenčne osebe v Wordu v EasyChair sistem na povezavi <https://easychair.org/my/conference?conf=is2023dfa>. Programski odbor bo pregledal in ocenil prispevke.

Prispevke pošljite v okviru naslednjih tem:

- rodnost
- umrljivost/zdravje
- migracije-selitve
- staranje prebivalstva
- pojavi in odnosi v sodobni družini
- projekcije prebivalstva
- medgeneracijska solidarnost
- odnosi med spoloma
- moralni / ideološki vplivi
- (prostorsko) planiranje v novih demografskih razmerah
- ekonomski vidiki
- antropološki vidiki
- sociološki vidiki
- zgodovinski vidiki
- matematično / računalniški modeli
- Slovenci po narodnosti / zamejstvo
- teološki in kognitivni vidiki

Program konference

Predstavitve bodo organizirane v sekcijah glede na predstavitveno temo in jezik. Načeloma bodo predstavitve v istem jeziku kot objavljen prispevek. Uradni jezik konference je slovenski in angleški.

Pomembni datumi

- Rok za oddajo prispevkov: 8. september 2023
- Obvestilo avtorjem: 13. september 2023
- Rok za oddajo končne verzije prispevkov: 17. september 2023
- Datum konference: 9. oktober 2023

Programski odbor konference:

Janez Malačič, predsednik, Mari Osredkar, sopredsednik, Matjaž Gams, organizator, Jože Sambt, Drago Čepar, Christian Gostečnik, Majda Černič Istenič, Boštjan Kerbler, Karin Kasesnik, Dušan Kidrič, Marko Krevs, Tomaž Merše, Janja Pečar, Janja Povhe, Jože Ramovš, Milivoja Šircelj, Petronela Vertot, Božidar Voljč

Organizacijski odbor IS konference:

Matjaž Gams, predsednik

Lana Zemljak, Vesna Koricki, Mateja Mavrič, Mitja Lasič, Blaž Mahnič

Dodatne informacije so na voljo na spletni strani <https://is.ijs.si>, e-mail is@ijs.si ali na tel.št.: 01 477 36 44, fax št.: 01 477 31 31.

DEMOGRAPHIC AND FAMILY ANALYSES

IJS - Ljubljana – Slovenia

October 9, 2023

About the Conference

The conference will be similar in format to the previous 16 demographic conferences within the framework of the multi-conference Information Society (is.ijs.si).

Over the past decade and a half, as we presented demographic projections and dilemmas, there has been a significant amount of criticism and denial, especially in recent years following appearances in parliament. However, current data clearly show that our projections were entirely accurate, and they remain credible for the future as well. The consequences of denying scientific findings are evident today and will be even more pronounced in the near and distant future. If we want to avoid experiencing a demographic and consequently comprehensive ordeal, we must disseminate our insights to the public as soon as possible and convince the leadership of nations to find appropriate solutions.

Terms such as "European demographic winter" are now joined by expressions like "the civilization decline of Europe." On one extreme are professional realistic analyses, standing side by side with demographic apathy, while on the other extreme are scenarios of collapse. Projections indicate the extinction of small European nations within a few centuries due to low birth rates. Slovenia, Croatia, and other EU countries also face similar demographic challenges. Nearly half a century of low birth rates poses long-term severely negative consequences and short-term diminished quality of life in the public and private spheres (family relationships), the economy, and essentially most components of societal and national functioning. It can be stated with great certainty that demographic decisions will significantly shape people's quality of life in the coming decades.

How to appropriately address demographic issues, what are the developmental trends and ideas in the world, the EU, and Slovenia? These will be the topics of professional discussions at the Demographic and Family Analysis Conference, which will take place as part of the 26th Information Society multi-conference in 2023.

We invite you to participate in this extremely important event by contributing or attending the lectures. Attendance at the lectures is free of charge.

Instructions for Authors

The program committee invites authors to participate by presenting their contributions that introduce new ideas and trends in the areas covered by the conference. The contributions can be both theoretical and empirical, but they must always be within the framework of professional or scientific work. The length of the contribution should not exceed four A4 pages, with a minimum length of half an A4 page. The contribution can be written in Slovenian or English. An abstract is mandatory, and the literature and other components must adhere to the typical structure of articles presented at scientific conferences.

The contribution format is available on the website: https://is.ijs.si/?page_id=14413. Authors should submit their contributions, including the title, email address, and contact person's address, in Word format via the EasyChair system at the link <https://easychair.org/my/conference?conf=is2023dfa>. The program committee will review and evaluate the contributions.

Please submit contributions under the following topics:

- Fertility
- Mortality/Health
- Migration-Relocation
- Aging Population
- Phenomena and Relationships in Contemporary Families
- Population Projections
- Intergenerational Solidarity
- Gender Relations
- Moral/Ideological Influences
- (Spatial) Planning in New Demographic Conditions
- Economic Aspects
- Anthropological Aspects
- Sociological Aspects
- Historical Aspects
- Mathematical/Computer Models
- Slovenes by Nationality/Borderland
- Theological and Cognitive Aspects

Conference Program

Presentations will be organized into sections based on the presentation topic and language. Generally, presentations will be in the same language as the published contribution. The official languages of the conference are Slovenian and English.

Important Dates:

- Deadline for submission of contributions: September 8, 2023
- Notification to authors: September 13, 2023
- Deadline for submission of final version of contributions: September 17, 2023
- Conference date: October 9, 2023

Conference Program Committee:

Janez Malačič, Chairman; Mari Osredkar, Co-Chair; Matjaž Gams, Organizer; Jože Sambt, Drago Čepar, Christian Gostečnik, Majda Černič Istenič, Boštjan Kerbler, Karin Kasesnik, Dušan Kidrič, Marko Krevs, Tomaž Merše, Janja Pečar, Janja Povhe, Jože Ramovš, Milivoja Šircelj, Petronela Vertot, Božidar Voljč

IS Conference Organizing Committee:

Matjaž Gams, Chairman

Lana Zemljak, Vesna Koricki, Mateja Mavrič, Mitja Lasič, Blaž Mahnič
